

# +BIR+LO+KI+ SYSTEM

by **nereei**  
emotional . intelligent

A new way of interaction through technology between the city, its inhabitants and visitors - constantly updated and customised

The system will evolve and expand with the pace of technology, incorporating new possibilities as they become available, and to suit the specific needs of each client.

Receive data and offers from local retailers based on your preferences and behaviour

# 1

## exchange data & information with Birloki 1

-> Input your interests and mood

+ Charge your phone, download the app

# 2

## receive info on the local area as you explore the city

<- Video, data, augmented reality, customised messages

# 3

## interaction between citizens and commerce

<- Obtain media rich info on the possibilities of the area.

The technology that brings the smart city to life

**Birloki**  
The urban space activator

# BIRLOKI SYSTEM

1. Mobiliario informativo modular
2. Gestión de contenidos
3. Gestión de datos

video: <https://www.youtube.com/watch?v=wG2EKiHFLEI>

## MODULAR SYSTEM

Birloki is a *plug+play* system that can adopt a myriad of configurations to suit your needs

### A robust product

Fabricated in steel, Birloki is fit for the urban environment, and conforms to Aenor – the most stringent European standard for safety and street furniture

Environmental Sensors

Tactile Screen & Phone Charger

Base & Meeting Point Seat

New Functionalities Module

Loudspeaker & LED Display

LED Mood Display

Spacer

### Installation

The system is delivered as *plug+play*, implemented and customised in 5 months

### Data management

We provide a complete management service for content and data, as well as advertising management

## Creating new experiences

by bridging the gap between the physical and digital spaces through constantly updated relevant data and info

### BIRLOKI 1

B1 is the information exchange, where users input data and receive info, charge their phone, or vehicle, and download the app, maps, etc

### BIRLOKI 2

Utilising iBeacon technology, the B2 will send customised data, like augmented reality, and info to your smartphone.

...y that brings the smart city to life

Posibilidad de integración y desarrollo de nuevos módulos. Cargador de vehículos eléctricos

# 2. Gestión de contenidos

Content management on the network of Birlokis in the city

# Gestión de contenidos. Interfaz

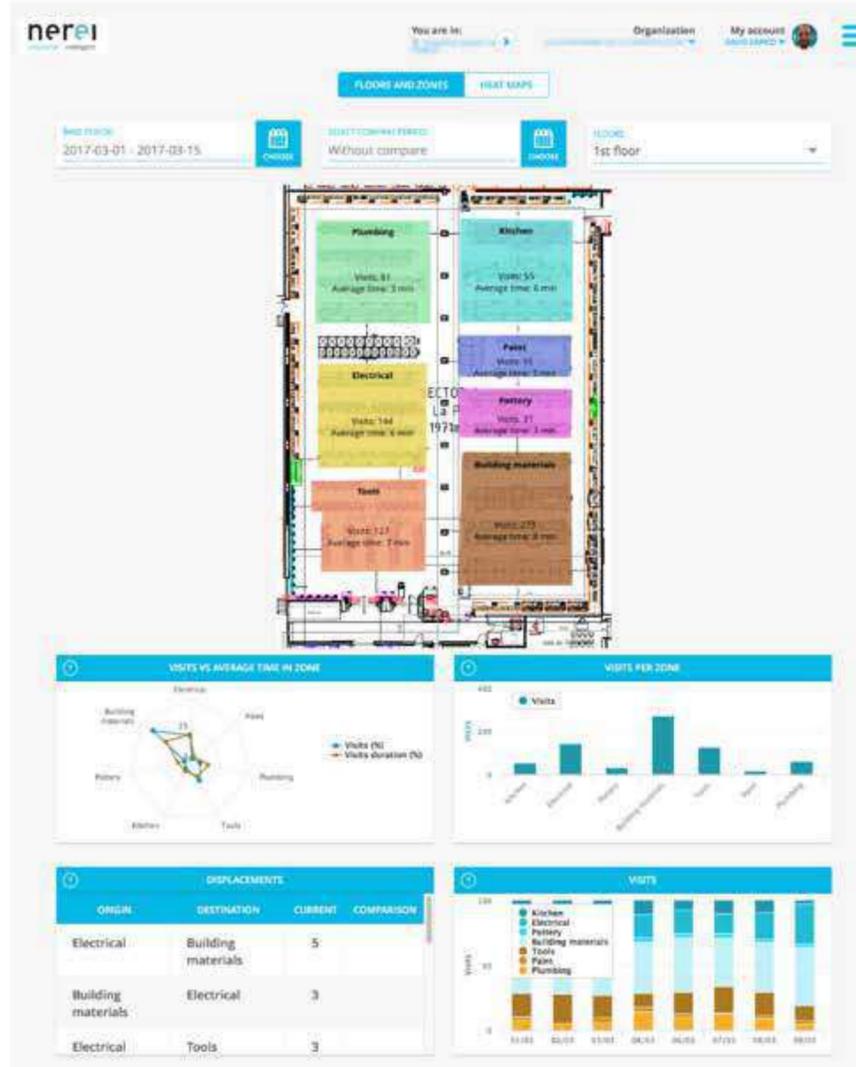

The image displays two screenshots of the nerei web interface. The top screenshot shows the main dashboard with navigation links (Home, LED Panel, Sound, Data) and the nerei logo. The user is logged in as 'singapore1'. The dashboard features a 'Status' section with a list of items, including 'tuesday\_testing2' and 'Hola Ivan'. Three main control cards are visible: 'LED Panel' (Edit the text to be shown in Bifok's LED panel), 'Sound' (Schedule a sound to be played), and 'Data' (Supervise your Bifok's data). The bottom screenshot shows the 'Sound' configuration page. It includes a 'Last soundfiles' list, a 'Soundfile' input field with '00010' selected, and a 'Select the days to play' section with checkboxes for Mon, Tue, Wed, Thu, Fri, Sat, and Sun. A 'Report' section with a 'Request report' checkbox is also present. An inset window in the bottom right shows a data visualization dashboard with three line graphs labeled 'TEMPERATURE', 'HUMIDITY', and 'PRESSURE' over time.

### 3. Gestión de datos

Number of visits, by days, hours...

track the customer's itinerary...

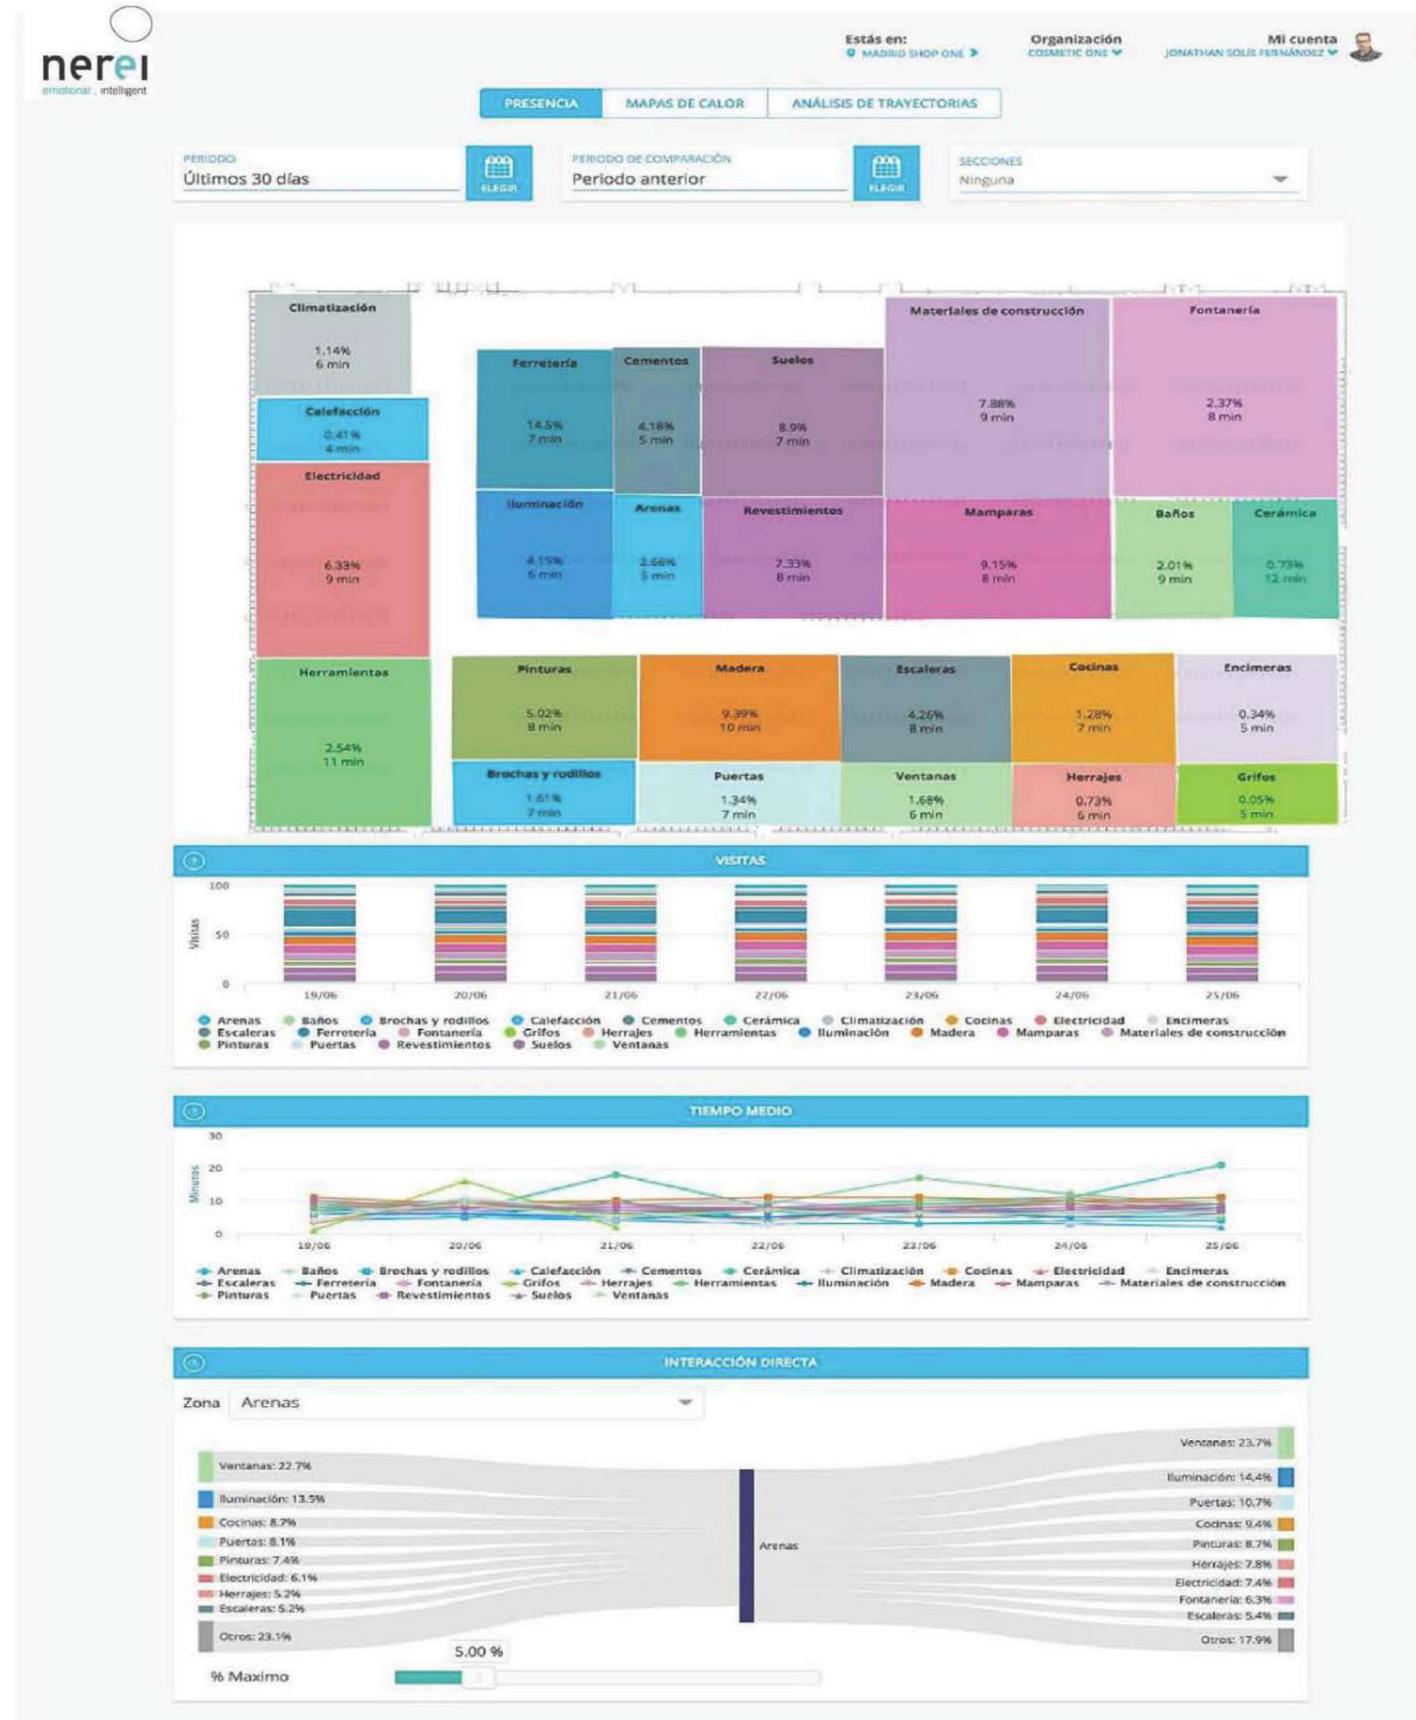

Mapa de calor presencia por cada punto de acceso (no de tráfico)

learn the most usual itineraries as well as the visits, the times of stay by categories

Gestión de datos:  
Movimiento y  
recurrencia de flujos.
